

CAREER OBJECTIVE

To become a professional full-stack developer and keep learning throughout my career.

PROJECTS

Book Store

The goal of this project was to develop an online platform to sell books and reach a wider audience.

- Users can browse books by category and view detailed book information and images.
- Users can add books to their cart, adjust quantities and proceed to checkout for secure payment processing via Stripe.
- Admin users can add new books, delete existing books, and update details such as name, description, and price and process orders.
- Redux toolkit for state management in react.
- Technology Used:
 - React and Node.js for frontend and backend.
 - MongoDB for database management.
 - Git for version control.

E-commerce

The goal of this project was to develop an online platform to sell products and reach a wider audience.

- Users can browse products by category, search for specific items, and view detailed product information and images.
- Admin users can add new products, delete existing products, and update product details such as name, description, and price.
- Technology Used:
 - React, Redux, Node, Express, MongoDB, Stripe, Cloudinary.

Chat Web App

The objective of this project was to develop an online chat application that enables real-time interaction between users.

- Users can create and manage their own profiles, including profile picture and display name.
- Users can search for and connect with other users, view their profiles, and initiate one-on-one chat conversations.
- Technology Used: React, Firebase, CSS, git.
